

Product Bulletin Advisement

Bulletin #: 49-060109

Brand: Garland

Date: June 1, 2009

From: Brian Arnold

Subject: New option on Garland Master Production Chain Griddles- CG Series.

Recently we added to the Garland Master Production Chain Griddles a new counter shorter 4"/102mm leg option. Up to now when these units have only been available with 6"/152mm legs for counter mount options. For some locations the 6" legs can make them too high to the working height particularly when installed onto refrigerated equipment bases.

When you request the no charge 4" leg option in lieu of 6" it reduces the overall working height and the unit will be supplied with shallower grease containers. The grease containers are still designed to contain a fluid capacity of 2.2 U.S. gallons or 8.28 litres. Units up to 48" wide would come with one grease container larger units 48", 60" and 72" will have two per unit.

We have set up this option to be order easily for CG gas griddles so far but if you have a need to adopt this option to the ECG electric models it can be easily done. If you have any questions please feel free to contact me.
