

# INDUCTION AIR INTAKE KITS

This chart is to help you to determine which air intake kit should be sent with the built-in (install-line) induction unit you are shipping out or ordering. Built-in induction units are not standard sit on the counter units. They are designed for a customer/fabricator to have them built into their own cabinet design. It is essential that proper air flow is maintained to cool the internal inverter coil (generates the alternating magnetic field to allow it to work) so we supply the air intake kit which is included into the cost of the induction unit. The CSR's must list/order the proper air intake kit for each built in induction unit required

There are two Air Intakes

<b>NEW ITEM #</b>	<b>OLD ITEM NUMBER</b>	<b>DESCRIPTION</b>
95000021	GIU-BI-AIR-KIT	BUILT IN FRESH AIR KIT SINGLE
95000020	GIU-BI-DUALBABY	GIU BUIT-IN AIR KIT DUAL/BABY

<b>NEW ITEM #</b>	<b>OLD ITEM NUMBER</b>	<b>DESCRIPTION</b>	<b>KIT REQUIRED TO BE SHIPPED WITH THE UNIT</b>
