

Product Bulletin Advisement

Bulletin #: 41-032508

Brand: Garland

Date: March 25, 2008

From: Brian Arnold

Subject: Product Change effecting Garland ED-15THSE
Electric Counter Hot plates

Effective immediately all new orders for the Garland hot plate ED-15THSE models requested as 208V single phase 60 Hz will be supplied with a Nema L6-30P plug (HUBBEL HBL2621 or equivalent).

There will be no extra charge and this only effects this model when order for 208V/1ph/60Hz. Volume requests for the electrical cord and plug for this model and voltage have been significant enough to be able to supply this feature at no extra costs when order in this combination.

If for any reason you request this model at 208 voltage single phase and it needs to be hard/direct wired the electrician can easily remove the cord plug.
